

## FEATURES

- Simultaneously display Conductivity and temperature
- Automatic temperature compensation
- Numerical locking (HOLD)
- High efficiency platinum electrode
- Electrode protection cap

## APPLICATIONS

- Industrial production
- Laboratory measurements
- Pharmaceutical manufacturing
- Agricultural cultivation
- Aquaculture
- Food safety
- Environmental protection

## TECHNICAL SPEC

|                       |   |
|-----------------------|---|
| Measure range         | 0-20 ms/cm                                |
| Resolution            | 0.01 ms/cm                                |
| Accuracy              | ±2%FS                                     |
| Screen display        | Conductivity + Temperature double display |
| Automatic Calibration | 1414 us/cm<br>12.88 ms/cm                 |
| Operating Temperature | 0-60°C(32-140°F)                          |
| Automatic shut-down   | 10 Minutes                                |
| Battery               | 1.5V battery (LR44) X4Pcs                 |
| Size                  | 40X185mm                                  |
| Weight                | 88g                                       |
