T9_{lte}

IoT tracking device

T9LTE is a small IoT device for longterm tracking and data monitoring of assets and equipment globally.

Featuring robust casing with long battery life, it comes with advanced and intelligent sensor technology.

It connects using the low power network technology LTE Cat-M1 and supports 2G fallback.

T9LTE is a small IoT tracking device and data logger that offers **asset monitoring and data tracking** of any asset; from non-powered equipment to entire fleets.

Its **robust casing** is suited for all industrial environments and all-weather conditions with an operating temperature range from -30°C to +85°C. Battery lifetime is typical 7 years based on 1 transmission/day.

The device uses the low power communication technology **LTE Cat-M1** to send transmissions to a server. Transmissions can be set at user-fixed intervals and if specified events occur.

Devices out of GSM coverage will **log data input** until coverage is available again.

A built-in **3-axis accelerometer** offers high-precision data on motion, shock and orientation, while other

sensors track light and temperature. Available **external wireless RHT and RFID-tags** offer humidity sensor and additional temperature data.

Position data is acquired by **GPS** or via mobile network triangulation if GPS is not available. A built-in radio beacon can be activated for close-range location.

Data can be viewed on a cloud-based data portal that provides **complete visibility and data analytics**. It provides insights on location, performance, and status of assets and equipment. Data is available on maps, in graphs and in reports. API options are available.

Flight mode feature is available to suppress all radio transmissions to ensure safe conditions during flight.

Devices are in operation all over the world in industries like construction, theft recovery, wind, and logistics.

Specifications	Туре: Т9.400		
Battery lifetime	Typically 7000 transmissions based on 1 transmission/day *		
Sensors	Position, Motion, Tilt, Light, Utilization, 3-axis Shock (up to 8 g)		
Data log	Store-and-forward log, default 300 entries of all data incl. position and sensor data		
Antenna, GPS	Internal		
Antenna, LTE/2G	Internal		
Antenna, radio	Internal		
Radio beacon	UHF		
Network technology	LTE Cat M1 / GSM EGPRS (850/900/1800/1900MHz)		
SIM	Embedded, subscription required		
Server communication	LTE/2G with SMS backup		
Server protocols	API available upon request		
Configuration	Via server		
External tag connectivity	Yes		
External tag connectivity Housing	Yes PA6 (nylon) potted with epoxy		
Housing	PA6 (nylon) potted with epoxy		
Housing IP rating Maximum allowed	PA6 (nylon) potted with epoxy IP69k		
Housing IP rating Maximum allowed continuous acceleration	PA6 (nylon) potted with epoxy IP69k 8 g		
Housing IP rating Maximum allowed continuous acceleration Dimensions	PA6 (nylon) potted with epoxy IP69k 8 g 112 x 68 x 39 mm		
Housing IP rating Maximum allowed continuous acceleration Dimensions Weight	PA6 (nylon) potted with epoxy IP69k 8 g 112 x 68 x 39 mm 405 gram		
Housing IP rating Maximum allowed continuous acceleration Dimensions Weight Battery package	PA6 (nylon) potted with epoxy IP69k 8 g 112 x 68 x 39 mm 405 gram 47 Wh (primary lithium, encapsulated)		
Housing IP rating Maximum allowed continuous acceleration Dimensions Weight Battery package Lithium content	PA6 (nylon) potted with epoxy IP69k 8 g 112 x 68 x 39 mm 405 gram 47 Wh (primary lithium, encapsulated) 3,8 gram		
Housing IP rating Maximum allowed continuous acceleration Dimensions Weight Battery package Lithium content Temperature, operating	PA6 (nylon) potted with epoxy IP69k 8 g 112 x 68 x 39 mm 405 gram 47 Wh (primary lithium, encapsulated) 3,8 gram -30 °C to +85 °C

Typical number of transmissions

Country of origin

Network	LTE	LTE/2G **	2G	
1 transmission/day	7000	6000	5000	
4 transmissions/day	10000	8000	7000	
24 transmissions/day	11000	9000	8000	

Without GPS, add 10% to above
